## The Musical Comedy "Campus Co-Ed." on Monday and Tuesday

With 60 People in Caste, Promises  
to Be Biggest Stage Show in  
Years in Community Hall

You've heard of "Betty Co-Ed." but the bright, merry musical comedy "Campus Co-Ed." is a production guaranteed to chase the blues from every man, woman and child fortunate enough to see it. Appearing under the direction of Jean F. Wallace, representing the Universal Producers Guild of Chicago, a talented caste and several choruses have been specially trained to present the most spectacular show seen here for several years.

Sponsored by an energetic committee of St. Alban's church, splendid co-operation has been shown by all who are assisting in the production and Miss Wallace, director, speaks well of the hearty support given.

A correction has to be made in regard to the matinee, announced on the posters and heralds. Since they were printed it was found that several members of the caste will be unable to appear in the matinee, therefore the admission price of 15c originally advertised for the children's matinee has been changed to 25c for children only at the evening performances. Adults admission is 50c, with an extra 25c for reserved seats.

Capacity houses on both night are expected, and ticket sellers are making a personal canvass.

Song hits include Silver Moon, Alma Mater, Row! Row! For Old Milford, That Little Frown, I'm Painting my Blackbirds Blue, Never Trouble Trouble, Its An Unnecessary Evil, Mickey Mouse.

**Cast of Characters**  
Dr. Better—Arthur E. Graham.  
Lucretia Higgins—Ethel Wilson.  
Ray Durlin (movie star)—Edna Fairhurst.  
Von Hoken (movie director)—Sidney C. Short.  
Howard Leslie—Jim Cousins.  
Steve (senior)—John Lloyd.  
Sunny Spurgin—Paul McDonald.  
Piggy Wright (freshman)—Reuben Johnson.  
Bee Weatherby—Winona Taylor.  
Joan Davis—Gwen Brown.  
Dr. Fellows—Tony DeCocco.  
Porter—Wm. Lombard.  
Frank Jenkins (husband of Fay)—Ray Spillers.  
Coach—  
Pianist—Mrs. E. E. Cranston.  
The groups include a chorus of Milford students, a rowing crew, tennis girls, Mickey Mouse group, artists group, campus cloggers, chorus of photographers.

A full dress rehearsal for the entire cast will be held on Saturday evening.

### Coal Production

The total coal production of Alberta mines to the end of October was 3,639,552 tons compared with 3,653,845 tons for the same period of 1933.

Auditors from the inspection staff made their annual audit of the local branch of the Canadian Bank of Commerce this week.

## Wm Kerr of Bellevue 1935 President of Musical Festival

At the annual general meeting of the festival committee on Dec. 3 in the Greenhill hotel, William Kerr, for many years a member of the executive, was elected to the presidency to succeed H. T. Halliwell of Coleman. The officer of president now alternates between the various Pass towns.

J. E. Upton, for many years vice-president, was again elected to this office, which he has efficiently filled almost since the festival started.

Mrs. J. H. Farmer was re-elected secretary-treasurer, with a tribute paid to her good work since taking over from the late Frank J. Smith.

Coleman members of the general committee for 1935 are G. Pattinson, J. Emmerson, Rev. A. S. Partington, Rev. Roy C. Taylor, Rev. Father Dunlop, Miss May Powell, and H. T. Halliwell.

Dates for the 1935 festival will be set at the next meeting of the executive.

Copies of the 1934 financial statement were ordered sent to all subscribers. The copies were kindly donated by the Blairmore Enterprise, a vote of thanks being recorded for same.

### High School Pupils Concert

In the K. P. hall, over 200 school children attended on Thursday afternoon, and the same number of parents and friends on Friday evening. The program in charge of the teachers included short sketches, vocal and instrumental solos, dialogues and orchestral selections. The proceeds were in aid of the piano fund of the school, and a substantial sum was netted, as expenses were very light.

The individual items were a song by Freda Antrobus, monologues, Dolina McLeod and Edna Morris; a play by Emma Rogers, Guerino D'Andrea, Bill Nimean and Armand Celi; a play by Nora Easton, Mary Hoyle and Tom Goldring; piano and violin selection by Elizabeth Moores and Unie Johnson; violin solo by John Pietraszko; a play by Patience Fraser, Foss Boulton, Bob Emmerson; dances and action play by high school boys; a pageant, the speaker being Jean McLeod; concluding with a broadcast by the boys.

The orchestra and chorus opened with several selections, Miss Powell conducting. The concert was very entertaining.

### Clarke--Hughes

A quiet wedding was solemnized at the United church manse on Saturday evening at 6 p. m. when Jean, daughter of Mr. and Mrs. Angus Hughes, became the bride of Walter Clarke, eldest son of Mr. and Mrs. John Clarke.

The bride was becomingly gowned in a rust colored crepe dress trimmed with black satin and gold ornaments made in the tunic style, and she wore a smart black turban, and blonde shoes and stockings.

Miss Gladys Higginbotham was bridesmaid, while Clarence Clarke, brother of the groom, was bestman. They will reside in Coleman. Mr. Clarke is an employee of International mine.

### Maranchak--James

Dec. 8, at the United church manse, Miss Mary Maranchak and Mr. Edward Royston James of Kimberley were married by Rev. Roy Taylor. Miss Louise Dacre and Victor Maranchak were the witnesses.

## TOWN OF COLEMAN

**PUBLIC NOTICE** is hereby given that from Oct. 1 to April 30 in each year, all children under 14 years of age must be off the streets by 8:30 p.m., unless accompanied by parents or guardians. Also that during the months of May 1 to Sept. 30, said children must be off the streets by 9:30 p.m.

—By Order, TOWN COUNCIL.

## Headliners in Wrestling Give Good Exhibition of Classy Battling

Bonnie Muir and Sam Leathers  
Gave a Good Show--Karasek  
Styled Good Showman

"The best yet" was the general comment heard from the fans who witnessed the wrestling card promoted by Frank Barrington on Saturday evening. He brought headliners in from Calgary to show the fans in the Pass "rasslin'" as it is called, and was greeted with one of the poorest houses in his career as a promoter.

The evening's entertainment opened with "What a man!" Karasek tangling with Dan Winters. These two grunt and groan artists squirmed in and out of every hold in the book, Karasek rousing the fire of the crowd by squirming out of the ring whenever he found himself in difficulties. Karasek redeemed himself during the match by getting Winters in some punishing holds and carrying on a conversation with his tormentors around the ring. Winters caused Karasek plenty of trouble on several occasions and justly earned a draw at the end of the time limit when neither had secured a fall.

"Bonnie" Muir of Australia tangled with "Long Legs" Sam Leathers. Both these men were out for the points and went after each other from the start. Leathers caused the crowd to gaze in amazement when he twice lifted his long legs over Muir's head in order to get out of a punishing hold. Leathers was the more aggressive during the early part of the bout and after 22 minutes caught Muir in a punishing body sissors putting on terrific pressure to finally subdue Muir for the first fall.

Muir went after the second fall but the going was tough. Leathers trying to get the fall and match for himself. Leathers' long legs gave Muir endless trouble as no matter how far he stretched them apart he never caused Leathers any trouble. He finally caught Leathers napping and put him through a series of body falls, finally getting the fall by a flying tackle while Leathers was standing in a daze. The second fall came in 44 minutes.

Leathers had a shade the best of the match on the evening's performance but since one fall each was scored the bout was declared a draw.

Fourteen tables were in play at the Caledonian whist drive and dance on Friday evening. Prize winners were Mrs. Wm. Pryde, Mrs. I. Neilson, Mrs. A. Wilson, consolation. Gentle—Wm. Ireland, Rebt Parry, A. Beveridge, consolation. Miss Jean Roberts and Charlie Roughhead were winners of the spot dance.

Miss Edith Ash is a patient in the local hospital this week.

## Social Credit Group Planning Visit of Aberhart

The local Social Credit Group anticipate a visit from their leader, William Aberhart, B. A., of Calgary, in the week between Christmas and the new year. A mass meeting will probably be held in the Community hall.

### Basketball Notes

Coleman basketball teams were no match for the Michel quintos on Monday evening when they went under by overwhelming scores.

The girls' game between the Michel Grads and Coleman was won by Michel by a score of 35-12. Coleman being unable to cope with the smooth game of the visitors.

The men's game saw the visitors score the highest number of points that has been clocked against Coleman this season. After the smoke of battle had cleared away the score board read Michel 62 Coleman 25. Enquiring as to the reason for the heavy defeat we were told that Coleman failed to last the pace and were a very tired team at the finish.

Mrs. George Dickson left Vancouver this week on her way to Scotland where she will visit with relatives for a few months.

## Coleman Airport Will Be Ready in 1935 For Regular Service

Selected as Most Suitable Site By  
Dept. of Militia and Defence  
Will Be Aviation Centre  
For Pass Towns

Work on Coleman airport camp under the direction of the Department of Militia and Defence, officially known as Project 58, has been suspended for the winter to be resumed in the spring, with a view to completion in 1935.

Selected about four years ago as the most favorable site in this area for an emergency airdrome, classed as intermediate in the trans-Canada air route, it is expected it will become a centre for flying activities when commercial and government aviation advances.

A few interested men in Coleman are considering promoting a syndicate to increase local interest in civil aviation, with a view to making Coleman the centre of activity. The field was originally selected by A. D. McLean, Dominion inspector of airports and airways, of Ottawa, after a careful survey of all possible sites in this section of the Crow's Nest Pass.

Coleman Board of Trade is endeavoring to create additional interest in the project.

The Heart Of Man

The season is at hand when once again the age-old song recorded in Holy Writ, "Peace on earth, goodwill toward men"—of which by millions of voices and the sentiment expressed in the words will be made the theme of countless sermons, addresses, and written articles—will be sung by this one. And the question will be asked by a perplexed people, asked in their bewilderment and sorrow, why is it that after the passage of nearly 2,000 years, instead of peace on earth and goodwill among and toward men, the world is filled with rumors of and preparation for war, and suspicions and hatreds are rife among people everywhere?

In seeking an answer to this question innumerable replies and reasons will be given. Many will lay the chief responsibility upon politicians; others will blame the inhumanity and selfishness of the makers of armaments; a goodly number will declare it is the existing economic system that is the root of the trouble; in a word, the tendency will be, as it has been throughout the years of the past, to apportion the blame to others and to institutions of our own making, but never to accept any share of it as our own responsibility. Yet, in the final analysis, the responsibility lies at our own door and rests with us as individuals.

A nation is but an organization of individuals, and the national viewpoint is but the aggregate of the viewpoint of the people who constitute the nation; the national spirit is the spirit of the people themselves. Politicians do what the people want them to do, and statesmen are forced to act, frequently against their own better judgment, because their people insist upon certain action and will accept and support nothing else.

Nations-to-day remain in a warlike mood because the individuals who constitute the nations are themselves lacking in goodwill to the one toward the other, and lacking goodwill—which is the only source of peace—there can be no peace.

Individuals clamor for security in their homes and occupations; nations as organizations of individuals demand security; but there can be no security either for the nation or the individual unless there be peace at home and abroad. Nevertheless, as individuals, in our own local communities, and in our relationships to each other, mankind is unmindful of these great truths and to a great extent maintains attitudes of suspicion and hostility instead of seeking for understanding and goodwill.

The world, and each and every community throughout the world, counts its men and women who, in the current language of the day, are chiselers, seeking to better themselves at the expense of others, trying to pull others down in order that they may rise, desirous of taking that which others have in order that they may possess it. Many creditors are harsh, unsympathetic and unyielding in their attitude towards debtors in great difficulty through no fault of their own and insist on their pound of flesh even though it means the ruin and destruction of the debtor; on the other hand, many debtors dishonestly seek to take full advantage of a difficult situation to cheat and defraud those whom they had asked to assist them in the past and who did assist them. And demagogues, both of the Right and the Left, of both high and low degree, take full advantage of each difficulty to fan the flames of discord and arouse and intensify feelings of enmity and prevent reasonable co-operation and the development of goodwill leading to peace and mutually beneficial compromise agreements.

The result is that all parties are invoking the power of the law to enforce their demands. As individuals they demand that force be applied as they would have it applied. The next step, of course, is that as national groups they demand that the same law of force be applied against other national groups. And that means preparation for applying such force, and war is the only alternative.

The answer to the question propounded above is that the heart of man is wrong. Mankind has not yet risen high enough, nor educated itself to the point where peace on earth and goodwill among men is really and truly desired. Mankind still prefers to live and rule by force, still prefers to act on the theory—it is not a principle—that might is right. Once man as an individual changes his viewpoint he will find politicians both ready and anxious to accept and act upon it; the armament makers will find themselves without an occupation; freed of all the restrictions and obstructions imposed by individual and corporate selfishness and the evils of narrow nationalism, the economic system will operate successfully.

The bringing of peace on earth and goodwill toward men is not a matter of law; it cannot be brought about by force; it must come, because it is the only way it can come, through change in the hearts of men. It will be a slow growth, a development to which every true lover of peace and every believer in the power of goodwill is called upon to lend his or her example and influence. Railing at others will achieve little; peace must be lived and goodwill practiced.

### INFANTS' COLDS

Relieved!

Young children easily catch cold. So Mrs. Russell Ward, of Hilda Beach, Ont., wisely says: "If I notice that there is any sign of a cold I give Baby's Own Tablets and find they are a great help." Thousands of mothers who have not only for colds but for fretfulness, indigestion, teething troubles, colic, upset stomach and so on, Baby's Own Tablets are soft and sure in relieving childhood's common ailments. Price 50c.

Dr. Williams' 136  
BABY'S OWN TABLETS

W. N. U. 2076

### Gasoline From Lignite

University of Minnesota Scientists Are Carrying On Experiments

Two University of Minnesota scientists, successful already in developing cellulose, a principal ingredient of rayon, from the aspen tree, speculated on the possibility of making gasoline from lignite.

The two, Professor Lloyd H. Rye and Ralph E. Brewer, hunting new materials and new uses for old ones with the co-operation of the Northwest Research foundation, were heartened by the success of German scientists in making gasoline from brown coal. Lignite, they pointed out, is similar in composition to Germany's brown coal.

Success of experiments in making gasoline from lignite would create an outlet for vast deposits of the low grade coal which underlies prairies of North and South Dakota and eastern Montana. Geologists have estimated their total at 1,000,000,000,000 tons.

### New Kind Of Concrete

Discovered When Workman Fried Meat On Waste Slate

A workman in a slate quarry in North Wales found himself without a frying pan when he wanted to cook his ham-and-egg dinner.

So he used a piece of waste slate instead. Then he left it on the fire and forgot about it.

As a result, a new kind of economical lightweight concrete has been discovered.

The piece of slate expanded in the heat. When it is broken up it can be used with cement to make a light form of concrete, such as is used in partitions and house walls.

"Its moisture expansion is much lower than that of the usual materials," an official of the department of building research said.

"It is easily made, and is an excellent key for plaster work."

### Seeking Mystery Tribe

British Couple Start On Romantic Quest In India

A British couple, Mr. and Mrs. D. L. Lorimer, have arrived at Balit, the capital of Hunza, in Northern India, on one of the most romantic quests in the world. They hope, in the course of a year's stop in the district to solve the mystery of the Burushaski language, which is spoken by a mysterious race believed to be descended from Alexander the Great. The Burushaski, who number about 20,000, are a clan of apparently Persian or Afghan origin. They live on both sides of the Hunza River, which divides the State of Hunza from that of Nagar, in a region of wild and almost inaccessible mountains. For generations they were the terror of the trading caravans between the Chinese Turkestan and Kashmir.

### Her Lucky Day

A very recent bride who was china-hunting in one of the big stores the other day was puzzled to find that one of the finest of all the sets in the place had been marked down to half its original selling price, and when she inquired why, the salesgirl told her it was because the wife came from Germany, and the store was closing out all German goods. At this, the bride, who is more than a little sympathetic with the boycott, looked over the set pretty carefully, and then ordered it sent to her apartment. Every piece was stamped "Bohemia."—The New Yorker.

### Have Greater Resistance

Greater physical endurance and greater resistance to infectious diseases, nervousness and mental disorders are attained by overweight young men as compared with young men underweight, according to British statistics.

Stoke-on-Trent is England's foggiest spot, having had 126 days of smoke haze in the period between October, 1932, and March, 1933.

### Backaches

Indicate kidney trouble. Gin Pills give prompt and permanent relief as they act directly but gently on the kidneys—cooling, healing and strengthening them. 50c a box at all drugstores.

### Prince Has Seven Names

The Prince of Wales bears seven baptismal names: Edward Albert Christian, after his grandfather, King Edward VII, and two great-grandfathers, the Prince Consort and King Christian of Denmark; George Andrew Patrick David, in honor of the patron saints of England, Scotland, Ireland and Wales.

The loftiest mountain in North America, now called Mt. McKinley, was known to the Indians as Denali, "Home of the Sun."

Wood veneers as thin as paper are being made on a commercial scale.

### YOUR HANDWRITING REVEALS YOUR CHARACTER

By LAWRENCE HIBBERT  
(Grapho-Analyst)  
(All Rights Reserved)

(Editor's Note: This series of articles is attracting wide interest, and many readers have written in to the author, asking for a personal analysis of their own writing. The author again invites readers to consult him, and you will find details of his offer in the following article.)

Miss S. writes: "I am 18 years of age, and in love with a man of 39. My parents do not like me having anything to do with him, and yet he wants to marry me. What would you advise?"

I believe you would be doing a very unwise thing if you marry him, Miss S. His writing tells me that he is very apt in his ways, is usually to having his own way, and domineer over others. And he is selfish to the core.

You, on the other hand, have a variable nature. Sometimes, you are cautious, whilst at other times you are apt to be impulsive. There is a good deal of indecision in your nature. You find it difficult to make up your mind, and you are young and some of your best years are ahead of you. Do not make a hasty, false step at this stage of your life.

On general principles, I am opposed to a young girl of your age marrying a man so much older, and I have known many cases where such marriages have gone on the rocks. Of course, there are cases where happiness prevails, but they are rare.

The odds are against happiness in marriages between April and September, to write figuratively. A man of 39, is more or less, mature in his views and outlook, while a girl of 18, is in most cases at least, on the threshold of life. And imagine, when you are 30, your husband would be over 60.

"School-teacher writes: I am discontented with the life of a country school-teacher. I get terribly out of patience with it, and dread the thought of continuing the school for years to come. I have a proposal of marriage from a young farmer, but he is not very well, and life with him would be something of a struggle. I like him quite a lot, and am wondering if marriage to him would not present an outlet for my present discontent. Should I accept his proposal?"

Contact with your position, Miss School-teacher, but am afraid you may only be jumping from the frying pan into the fire. You are of a restless nature, ever on the move, and routine or the humdrum is very irksome to you.

You do not say that you love your young farmer friend. If you did, I might be tempted to say "go ahead" for he has a likeable sort of nature, and is sincere and anxious to make a success of his work.

You may find in the course of time that you love your friend enough to marry him, but at the same time, develop your outside interests to provide that change and variety that your nature demands.

Your handwriting tells the true story of your character, without frills. And you can find out what your friends are really like—whether they are sincere or dishonest, reliable or unreliable. Send specimens of the writing you wish to be analysed—as long as possible, please—and enclose 10c coin for each specimen. Send with 3c stamped addressed envelope, to: Lawrence Hibbert, care of Winnipeg Free Press, 175 McDermott Ave., Winnipeg, Man. Letters will be answered as quickly as possible, but please allow at least two weeks for your reply. All letters are confidential.

### Gift From Canadian Greeks

Buffalo Of Manitoba Bronze Sent To Royal Couple

A life-like buffalo, of Manitoba bronze, mounted on a base of Manitoba marble, was sent to London, the wedding gift of Greek residents of Manitoba to Princess Marina and Prince George.

The buffalo and base is about two feet long and two feet in height. A Greek design encircles the base, on which is mounted the Manitoba coat of arms.

On a gold plaque is inscribed "To Princess Marina and Prince George 'Hellenes' of Manitoba, Canada."

At October 31, 1934, forty-three per cent. of the land in Canada intended for the 1935 crop was estimated to have been ploughed, as compared with forty-one per cent. in 1933.

While America is still on a beef basis, Great Britain has changed to mutton, Germans use pork primarily for meat, and Chinese take rats or whatever they can get.

## Fewer, Less Severe Colds With Colds-Control Plan

New Aid In Preventing Colds  
Makes Possible Better Control  
Of Colds in the Home

### CLINICS PROVE PLAN

Mothers can now help their families to greater freedom from colds—fewer colds, shorter colds, milder colds—thanks to the development of the new Vicks Plan for Better Control of Colds. The Plan has been clinically tested by physicians—and its effectiveness is being proved daily in thousands of homes.

The Plan, perfected by the makers of Vicks VapoRub, is introduced along with the new aid in preventing colds, Vicks Va-tro-nol (for nose and throat). This new Vicks preparation is the ideal companion to VapoRub, the modern method of treating colds. Briefly, the Plan is this:

To Help Prevent Colds  
Watch yourself and children after exposure to any condition that you know is apt to be followed by a cold, such as—

Exposure to others having fresh colds—colds, stuffy ill-ventilated rooms, public places—sudden changes in temperature—excesses in living, such as over-eating, smoking or drinking, which reduce body resistance. Then—at the slightest irritation of

the nasal passages, where most colds start—use Vicks Va-tro-nol at once. Just a few drops up each nostril. Repeat every hour or so if needed. Va-tro-nol stimulates the functions provided by Nature, in the nose, to prevent colds—and to throw off colds in their early stages. Used in time, Vicks Va-tro-nol to avoid many colds entirely.

To Help Shorten a Cold  
If a cold has developed, massage the throat and chest well with Vicks VapoRub. It attacks the cold direct—two ways at once—by stimulation and inhalation. Through the skin, it acts like a poultice or plaster. At the same time, its medicated vapors, released by body heat, are breathed in direct to inflamed air-passages.

During the day—any time, any place—use Vicks Va-tro-nol every few hours as needed to clear clogged nasal passages. This gives you full 24-hour treatment, and without the risks of constant internal dosing, which so often upsets digestion—especially of children.

Trial Offer Guarantee  
Your druggist is offering Vicks Va-tro-nol and Vicks VapoRub on the following trial guarantee: Use as directed in Vicks Plan for Better Control of Colds (details in each Vicks package). Unless you are delighted with results, your druggist is authorized to refund your money.

### Chances Appear Slim

Hardly Possible Franklin's Log Books Will Be Found

Any log books Sir John Franklin may have left before he perished almost a century ago in the arctic would most likely have been found by Capt. Peter Freuchen, arctic author and explorer, answered when questioned as to the chances of F. K. Pease, an adventurous young Briton, finding any records of Franklin's epic voyages.

Pease passed through Montreal two months ago with a dog and 30 tons of equipment bound for the arctic, and a search for documents dealing with Franklin's northern saga he thought he might discover.

### Cash For Beet Growers

Harvest This Year Totals Close To Million Dollars

Another quarter of a million dollars in cheques has been received by beet growers of Southern Alberta.

The new payment will make a total of \$610,000 paid out on the initial base rate of \$5 per ton, with a final payment to be made at the completion of the delivery season.

With a record crop of 170,000 tons, the beet growers will receive close to \$1,000,000 for their harvest this year.

In cold weather men stamp their feet and blow on their hands to keep warm, whereas wild animals and birds seem to conserve their body warmth to best advantage by staying very still.

Granulated sugar sifted over the top of a sponge cake before putting it into the oven gives it a rich brown crust when baked.

### Strait Does Not Exist

Admiral Byrd Says Land All Way To South Pole

A newly discovered section of land in Antarctica has been claimed for the United States by Rear-Admiral Richard E. Byrd.

A huge stretch of ice-covered Antarctic wastes, which previously had been considered to be over water was said by Byrd to be land. He made this announcement in a radio message to President Roosevelt following a flight east into Marie Byrd Land.

He brought back with him conclusive evidence that Marie Byrd Land runs in an unbroken line from the Antarctic coast to the South Pole and that a trans-Arctic strait does not exist. Byrd declared it is all land "overwhelmed by ice to be sure, but land, anyway."

## MAKE YOUR FALSE TEETH HOLD FAST

Eat, talk, sing and shout and never feel embarrassed. Your false teeth stick all day long when you sprinkle on Dr. Wernet's Powder—they fit snugly—comfortably—they can't slip. Prescribed by world's leading dentists—they know it's the best! Costs but little—any druggist.

The winter mortality of the rather threatening number of chinquapin in south-western Ontario this past season is under observation of officers of the Entomological Branch of the Dominion Department of Agriculture against a possible serious outbreak in 1935.

Caves and subterranean dwellings provide homes for more than 100,000 persons throughout northern Africa.

## CONTROL THE ODOR

It isn't necessary to put up with cooking odors all through the house when you bake or boil fish. Wrap the fish in Canapar Cookery Parchment. Not only will the odors stay in the fish, but the fish will come from the pan more richly flavored, with its full natural flavor retained.

## Makes Vegetables More Delicious, Too

Instead of allowing much of the goodness and flavor of vegetables to escape in steam, cook them in Canapar. With Canapar you can cook several vegetables in a single pot. The flavor isn't any one's intestine. Line meat pans with Canapar, too, to prevent fat burnings. Canapar improves flavor and food value—saves fuel—and eliminates pot scraping and scouring.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

## Want Lower Freight Rates For Low-Grade Grain Shipments To U.S.

Winnipeg.—A large potential market in the United States for Canadian low-grade grain will prove of immense value to Canada only if Canadian railroads lower their freight rates, declared John I. McFarland, general manager of the Canadian Wheat Pools, on his return to Winnipeg from Washington and Ottawa where he has been negotiating sales to the United States.

The government's wheat manager found the United States needing to import very large quantities of wheat and other feeds to maintain its livestock population, "but whether the Canadian producers will participate in this market will depend very largely on the attitude of the Canadian railroads."

"The extent of the shortage of feed in the republic to the south is only just being realized," continued Mr. McFarland.

Canadian railroads should recognize, he said, "the United States is an importing nation, and that grain moving to it from Canada should be granted an export rate."

"Other countries will be seeking an outlet for their surplus grain in the United States and will have the benefit of export rates to U.S. ports, but Canadian farmers would have an advantage over their competitors if only conceded a freight rate equal to that applying to exports of Canadian grain to European or other overseas countries."

Mr. McFarland made it quite clear the sale of Canadian wheat and other grains to the United States would be made through commercial channels. It is not apparently the intention of the two governments to make a deal for the importation of Canadian wheat on an official basis, but rather to facilitate the movement through commercial channels and give the importations as wide a distribution as possible.

### Estimate Of Wheat Crop

Place 1934 Wheat Crop At 250,465,800 Bushels

Winnipeg.—Based on actual threshing returns the Northwest Grain Dealers' Association issued a statement estimating the Western Canadian wheat crop for 1934 at 250,465,800 bushels.

Previously the Dominion bureau of statistics had placed the estimate at 263,000,000 bushels, made prior to collection of threshing returns.

Ninety-six per cent. of the country points in Western Canada made reports for the estimate.

### Credit For Reichsbank

Berlin.—The Bank of England has extended to the German Reichsbank a one-year credit amounting to £750,000 (about \$3,750,000), it was announced by the German central bank. This credit will be placed in the special account created by virtue of the recent Anglo-German trade compensation agreement, and £400,000 (about \$2,000,000) of the total will be used by British creditors.

## Red Terror Runs Riot In Russia With Many Victims Summarily Shot

London.—A Warsaw despatch to the Express said Red terror ran riot in Russia with more than 200 persons, including women and children, summarily shot within the last few hours.

The despatch said the sound of shooting was heard every few minutes in the law courts and that among those executed was the assassin, Leonid Nicoloff, who slew the Communist leader, Serge Kiroff, Nicoloff's wife, sons, two daughters and 85-year-old mother.

Fourteen officials of the Moscow OGPU, the union state political administration, also were executed according to the Warsaw report.

Joseph Stalin was reported ruthlessly purging the country because of the slaying of Kiroff. Having discovered a serious split in the ranks of the OGPU, he dismissed Chief Yagda and ordered widespread arrests and executions and called in the Red Army to protect himself and the government.

Finding disaffection in the Lenin-

### Farmers Resent Agitators

Greeted With Barrage Of Rotten Eggs At Alberta Meeting

Edmonton.—A barrage of rotten eggs hurled by irate farmer anti-strikers greeted speakers substituting for grain strike agitators when they appeared before a meeting at St. Michael, east of here.

Peter Kasian and Mike Yaniv, of Royal Park, proxies for Peter Kleparchuk, Mundare district delegate to Soviet Russia two years ago, who now is awaiting hearing of his appeal against a two-month jail term for wrecking a grain wagon while picketing, and William Pijpov, town councillor of St. Michael and chairman of the meeting, were liberally spat upon with foul-smelling debris when the meeting broke up in disorder.

Kasian and Yaniv were sent by Kleparchuk to hold the meeting while he was busy in Mundare with hearings before the board of grain commissioners, sent to investigate the grain strike in that district.

The speakers had hardly finished presenting the case for the strike when the farmers, deciding against strike measures, pelted those on the platform with five dozen over-ripe eggs.

Two days' investigation by Canada's board of grain commissioners of the causes of the grain strike which for more than a month has hindered farmers' delivery of their crops to elevators over an area of 4,000 square miles in central Alberta has revealed no evidence of general unfair practices or irregularities, members of the board said.

### Valera Gains Six Seats

But Still Lacks Clear Majority In Upper House

Dublin.—President Eamon De Valera's Fianna Fail party gained six seats in the Irish Free State senatorial elections, but failed to gain a clear majority in the upper house, which has continued under sway of the opposition since the Republicans came to power in the Free State.

The results made the standing in the new senate as follows: United Ireland party (opposition) 30; Fianna Fail (government) 19; Labor, seven, and Independent, four. In the last chamber the U.I.P. had 36 members, the Fianna Fail 13, others 11.

The senate consists of 60 members, one-third of whom retire every three years. Elections are not on the ballot, the seats being filled by elections at which electors are the members of both houses voting on a proportional representation basis.

### Aviators Have Narrow Escape

Edmonton.—When their aeroplane fully loaded with mining supplies, including 500 pounds of dynamite, plunged through the ice at South Cooking lake air harbor and sank into six feet of water, Pilot William Jewett, Trail, B.C., and Air Engineer Dave Bishop narrowly escaped here.

### E.P. Ranch Wins Award

Herd Of Shorthorn Cattle Captures Seven Prizes At Chicago

Chicago.—A herd of five Scotch Shorthorn cattle entered in the International Livestock Exposition by His Royal Highness the Prince of Wales, won a total of seven awards. It was announced.

W. L. Carlisle, manager of the royal E.P. ranch at Hlsh River, Alberta, was presented with the ribbons, which included one first, three seconds, a third and two fifth places. Carlisle admitted that he had hoped to collect more blue ribbons at the international.

The failure of the prince's herd to repeat his success of 1925 when his prize bull was named senior champion might be laid at the feet of Thomas E. Wilson, veteran Chicago packer, whose entries nosed the prince's cattle out of first place in two divisions in which the E.P. entries finished second.

The Prince of Wales won the following awards: First get of sire, second senior yearling bull, second bull calf, and second showing of two bulls, third showing of three bulls, and fifth two-year-old heifer and the fifth senior veal calf.

The Canadian entries will be returned to the E.P. ranch after the exposition, Mr. Carlisle announced. They will not be sold here as will many of the cattle entered in the show.

The selection of Peter J. Lux of Shelbyville, Ind., as the world's corn king placed him in the class with Herman Trele of Wembley, Alta., who was barred from competition in the wheat class until 1936 because he won the crown three years in succession.

Lux, four times the corn king of the exposition, cannot enter that class again for three years.

### Boat Trapped In Ice

Crew Of Hudson's Bay Co. Schooner Waiting For Rescue Plane

Edmonton.—Midway between Copernicus and Akivik on the Arctic coast, the Hudson's Bay Co. diesel-powered schooner Margot A. is trapped in the ice in Letty Harbor and its crew of half a dozen men have been held prisoners since October, according to word brought here by northerners.

The ship is believed to be well stocked with provisions and except for the long wait for a rescue plane the men are suffering little discomfort. An aeroplane will take off as soon as flying conditions permit from Cameron Bay to bring in the captain and engineer, but nothing of the crew will be left in charge of the craft.

### School Reforms

Ontario Teacher Favors Intelligence Tests Instead Of Examinations

Toronto.—B. A. C. Ketchum, head master of Trinity College schools, proposed a university board to control matriculation examinations in all provinces and to reduce the examinations to four. Mr. Ketchum addressed the annual old boys' reunion dinner of the schools.

He declared he believed the end of examinations was near but the "funeral" a long way off. He declared he favored intelligence tests instead of periodical examinations.

### GRANDSON PAYS TRIBUTE TO GREAT SOLDIER

Here we see four-year-old Master Douglas Scott, grandson of the late Field Marshal Earl Haig, putting a poppy cross on a portion of the field of Remembrance at Westminster, dedicated to his grandfather, on Armistice Day.

### SCORES VICTORY

Captain F. A. Ahearn, leader of the Irish Free State Army team, who won the military broad jump during competition at the Royal Winter Fair Horse Show. Captain Ahearn is shown with "Ireland's Own," a 5-year-old brown gelding, which he rode during the competition.

### Amend Wage Act

British Columbia Legislature To Take Means To Prevent Injustices

Victoria.—Some action will be taken at the next session of the British Columbia legislature to amend the Minimum Wage Act to prevent a recurrence of dismissals of employees above the age of 21 and their replacement with youths entitled to only the lowest minimum wage, Hon. G. S. Pearson, minister of labor, announced.

Certain industries had taken advantage of the classification to evade the intent of the act, the minister said. "We have seen for ourselves how this has worked to the disadvantage of the higher grade of employee and forced him out of his job." He did not suggest what form the proposed action would take.

### I.O.D.E. Scholarships

Alberta And Saskatchewan Winners Named For Post Graduate Work

Toronto.—The national executive committee of the Imperial Order, Daughters of the Empire, announced the winners of the overseas post-graduate scholarships in the I.O.D.E. war memorial. There are nine winners, one in each province, who each receive a scholarship valued at \$1,600.

Among the winners are: Alberta—Beth Carscadden, University of Alberta. Saskatchewan—Neil Barron Hutcheon, Regina, University of Saskatchewan.

### Aged Indian Dead

Calgary.—Nearly 100 years old and still wearing the metal bracelets and necklets placed on her arm and neck when she was a child, Spear Woman, of the Blood Reserve, is dead, victim of an accident near her Spring Coulee home.

## Clear Up Misconceptions In The Public Mind About Central Bank

### Solve Farm Problems

Co-ordinating Body Has Been Collecting Information

Ottawa.—Insofar as agriculture is concerned, Canada already has a national co-ordinating body which has been studying and collecting information in the manner being advocated by Premier John Bracken of Manitoba, high officials of the Dominion government, stated here.

The Manitoba premier, now visiting here, had succeeded in interviews and addresses that such a body be established and steps taken to find a solution for the drought problem of Western Canada.

In 1932, Minister of Agriculture Robert Weir called together a national conference on agricultural services in Toronto at which was organized the national advisory committee with Mr. Weir as chairman.

The committee has functioned actively since in bringing about co-operation between federal and provincial departments, universities and colleges in eliminating duplication of effort and making available the mass of information collected in various quarters for the solution of Canadian agricultural problems. A second national conference was held in Regina in 1933.

### Farm Livestock In Canada

More Cattle And Sheep This Year But Fewer Horses

Ottawa.—Canada had fewer horses and more cattle on the farms this year than last, according to a report issued by the Dominion bureau of statistics. There were more sheep and fewer swine.

By provinces, horses show decreases in all except Nova Scotia where a slight increase is shown. Total cattle have declined in all the provinces, with the exception of Saskatchewan, Alberta and British Columbia. Sheep have increased in all the western provinces. Swine have decreased everywhere except in Quebec, where an increase is indicated. Total poultry show increases in Nova Scotia, Saskatchewan, Alberta and British Columbia, and decreases in Prince Edward Island, New Brunswick, Quebec, Ontario and Manitoba.

### Alberta Legislature

Indicated Last Session Before Election Will Be Held In February

Calgary.—The Alberta legislature, it was indicated here, will be convened for the last session before elections, some time during the first week of February.

Hon. J. F. Lymn, attorney-general, in Calgary on government business, said he expected the session to start "about the same time as last year." Last year it opened February 8.

## Serbian Contingent Of The Yugo-Slav Army Crosses Hungarian Frontier

Szeged, Hungary.—A Serbian contingent of the Yugoslav army crossed the frontier into Hungary, challenged a weaker border force to combat, and precipitated a situation fraught with peril.

The invasion was the result of the order of Yugoslavias expelling 27,000 Hungarians from the country and was one of a series of incidents resulting from the October 9 assassination of King Alexander.

The Serb troop crossed into Hungarian soil three miles from here in the early morning hours. Only the greatest disciplinary actions on the part of the Hungarian officers prevented the outbreak of fighting. The situation was most tense and future trouble was feared.

The Yugoslav soldiers shouted threats and curses across the line at the Hungarians as thousands of those affected by the expulsion order continued to pass into Hungary.

This town and others near it were choked with the refugees. More thousands were on their way as fierce indignation prevailed against Yugoslavia in the frontier villages, where

Winnipeg.—Misconceptions in the public mind as to what would constitute the functions of the Bank of Canada were cleared up here by Professor J. D. Day, McGill University economist, before the Winnipeg Bankers' Lecture Club.

It appeared to be imagined, Prof. Day observed, the Bank of Canada would compete with chartered banks and provide cheap credit for every body. This was not so, he emphasized.

The Bank of Canada was a reserve bank and could not accept deposits from the public or transact much of the ordinary business of a commercial bank. Its right to lend money was carefully and properly limited and, in any case, the rate for loans would always have to be proportionate to security.

Essential function of the bank, he continued was to endeavor to regulate the general pace of credit expansion and contraction so as to avoid, as far as possible, the extremes of booms and slumps and to keep Canada on a steady and sounder progress to prosperity. Prof. Day quoted the words of the first governor of the Reserve Bank of South Africa:

"A central bank performs the same benefit for the daily traffic in the banking world as the pneumatic tire does for the motor car. It cushions the bumps and makes the whole service easier, smoother, speedier and more efficient."

### Want Federal Loan

Alberta Needs Money To Enable Province To Carry On

Ottawa.—Premier R. G. Reid of Alberta, accompanied by Hon. George Hoadley, his minister of agriculture, presented to Finance Minister E. N. Rhodes a request for a Dominion government loan to the province of a sum considerably in excess of \$1,000,000, to enable that province to satisfactorily settle its immediate monetary requirements.

While no official decision was possible pending a meeting of the cabinet, it was understood the provincial ministers were satisfied their wishes would be met in one form or another.

### Outstanding Women

Arthur Brisbane Names Mrs. Oliva Dionne In Category

New York.—Ontario's mother of quintuplets is considered by Arthur Brisbane to be one of the outstanding women of 1934.

Mrs. Oliva Dionne of Callander, Ont., whose five little girls are prospering, Mrs. Franklin Roosevelt, wife of the United States president, and five others are named by the well known editor and news commentator as the outstanding women of the year, in a magazine article published recently.

## NOTES AND COMMENTS

IT is so easy for people to fall into a rut which will eventually place them in the "has-been" class. Self discipline is one of the greatest essentials for progress or even keeping abreast of moving events. Individual effort is as necessary now as ever it was, and it is by individualism and not by paternalism by governments and all and sundry proposed political schemes for alleviating the failings of the human race that we will triumph over difficulties. A little more faith in individual power, a little more faith in a supreme being, and a little more self-reliance and self-determination would help many a weak brother over the hurdles of life. Self-help is the best help.

BOYS and youths of teen age constitute a problem, some more than others. In some towns the churches or service clubs foster boys organizations. Unfortunately for the boys, Coleman has no such organization, except the Boy Scouts under Reggie Jones and Mr. Llewellyn, who appear to be more actively interested in boys activities than others who really have time to devote to this work. Less of politics and more of real church work would endear more people to the churches. If they are to be the focus of political ideals, then the teachings of Christ must naturally fade into insignificance. There are still old-fashioned people who go to church to gain inspiration from the Word of God.

PEOPLE must realize they are the government, states Mr. Beatty, president of the C.P.R., in addressing a gathering on some of the evils of government control and operation of Canadian National Railways. State ownership has made a sorry mess of the railways, constituting Canada's biggest debt burden. Such an example is not calculated to influence public opinion towards governmental operation of other public services. Private operation undoubtedly makes far more efficiency. One sees on every hand examples of slackness in public control, whether it be from the humble village council to the many forms of corrupt city government, more prevalent undoubtedly on the other side of the line than in Canada.

WE ALL become very serious in the pursuit of our vocations and even our pleasures. Almost everyone has a pet theory to solve the problems of mankind, and everyone has a hobby. With some it is politics; others enjoy pleasures of a less controversial nature. Yet in most cases everyone is imbued with enthusiasm for his particular cause; some from conviction, others by sentiment and emotion. Others act first and think afterwards, sometimes increasing the evils from which they hope to escape. Yet occasionally various individuals of differing opinions may meet and find after rubbing shoulders that there is not the foolishness or lack of sincere intention existent which may have been thought lacking. It is a good thing at times to cast aside restraint and take relaxation from matters we are prone to too seriously regard. To relieve the mind of bias and prejudice is a difficult task, yet to reach impartial decisions it must be done.

To enjoy a little relaxation, people of this community will have an opportunity on Monday and Tuesday next. The musical comedy, "Campus Co-Ed," includes in its cast quite a number of our boys and girls and a few of the older people. People may wonder how a play can be produced in so short a time, but after reading of its success in Cranbrook and Kelowna, an equally good measure of success might well be forecast here. Productions of this nature are productive of goodwill among young people, who enjoy entertaining others, and many a parent will be an interested spectator besides a host of others. The splendid co-operation shown so far by those taking part in the production, under the capable direction of Miss Jean Wallace and her sister Margaret, who represent the Producers Guild of Chicago, augurs well for the success of "Campus Co-Ed" on Monday and Tuesday.

NEXT week will be our last issue

before Christmas and this is a good time to get ready for it by making up our minds to make the most of Christmas and its season of good cheer and good will.

No matter which party may hold a meeting, it draws people to hear and discuss matters of common interest. The more activity there is along various lines, the more business usually results.

## Local Lads Charged With Disturbances

John McCulloch, aged 21 years, was charged before Police Magistrate Gresham with causing a disturbance at the Community hall by securing a ladder and prying open outside shutters of a window.

The offence occurred during the progress of a wrestling match on Saturday night, Dec. 8. McCulloch pleaded not guilty.

Constable Houghton stated that his attention was called by A. Easton, caretaker, to boys on the outside. He went out and caught McCulloch coming down the ladder, several others getting away in the darkness.

McCulloch, in defense, stated he did not leave the theatre till 10.35, therefore could not have been on the ladder at the time stated.

Magistrate Gresham in giving suspended sentence stated that he was accepting Constable Houghton's evidence as against McCulloch's, and warned him that if he came before him on a similar charge or other young men were charged with similar disturbances at the Community hall, they would be given more severe penalties.

In the juvenile court with Jas. Ford presiding a boy aged 15 was charged with creating a disturbance in the ante room of the main hall during a basketball game on Monday even-

ing. Arthur Dutfeld as door-keeper told the boy to leave the premises, as he was instructed to admit no person without paying admission. The boy refused, and in Dutfeld attempting to eject him he resisted with the result that a window was broken and two of Dutfeld's teeth were dislodged.

The magistrate assessed the costs of the damage, and ordered the lad to report regularly to the police during the next three months, or on failure to do so he would be made a ward of the province.

QUALITÉ EXTRA SUPÉRIEURE

## WORLD HAPPENINGS BRIEFLY TOLD

Henry Wise Wood, veteran chairman of the Alberta wheat pool, was re-elected to office at the annual meeting at Calgary. C. Jensen of McGrath, was named vice-president.

Viscount Buckmaster, chairman of the governing body of the Imperial College of Science and Technology and a former lord chancellor, died recently in London.

A special period of training of French reserve soldiers as part of a plan to build up the nation's defenses, especially along the Rheland frontiers, was announced recently.

Government regulations on the sale of liquor in Newfoundland have been radically changed, according to an official communiqué. Amount of purchases, hitherto set at three bottles of spirits a week, is now unrestricted.

A rubber exhibition opened at the Science Museum, South Kensington, and running six months, will include two rubber seeds brought from the Amazon by Sir Henry Wickham in 1876.

Bird fanciers who attended the All-England show at Norwich, England, talked of purple and red canaries as being possibly shown at next year's exhibition, feeding having been discovered as the secret of color.

The appointment of F. G. T. Lucas, K.C., of Vancouver, to be a judge of the supreme court of British Columbia has been approved by the governor-general. He succeeds Mr. Justice Macdonald, resigned.

A course in marriage to instruct men students how to avoid unhappy unions is being considered by the University of Washington. Dr. Norman S. Hayner, associate professor of sociology, disdaining, the course would be open to seniors only.

An adverse trade balance of nearly \$100,000,000 for the year ended October 31 was revealed in Irish Free State trade statistics. As in recent years much of the adverse balance is attributed to the dispute with the United Kingdom since the advent of the Republican government to power.

## Japan Plans Airline Link

Mandated Islands Are To Be Joined With Mainland

Japan is preparing to open southward thousands of miles of airway to fasten her Pacific Island possessions and mandates more firmly to the homeland.

Two naval aviators who sailed recently from Yokohama are now surveying the route between Salpau and Palau, using a seaplane of 1,200 miles cruising-radius. Their arrival was prepared for by establishment of meteorological observatories and wireless stations at Salpau, Palau and Truk.

The Japanese hope to link this into island service water with Japan proper in an air-service from Tokyo to Salpau by way of the Bonin Islands. An appropriation to subsidize this new route was contained in the Government's 1935-36 budget just completed.

The Tokio-Bonin Islands line will be the first link of a projected airline to join the Imperial capital with its farthest flung mandates, one-third of the way across the Pacific, lying directly toward the projected American air routes from California to the Philippines and China.

## Longest Fence In World

The world's longest fence—40 kilometers, or about 25 miles—is to be erected along the Norwegian-Finnish border to prevent the nomadic Lapp stray flocks of reindeer wandering uncontrolled from one country to the other.

## Should Take Precautions

From Kansas Comes A Warning About "The Twin Perils" To Farm Children

In a letter just received from Independence, Kansas, Mr. A. Z. Potter says that having been raised on a farm he has first hand knowledge of the sad deaths of a good many children caused by the carelessness of their elders. Every parent should take heed to this warning—offered in a friendly spirit by our correspondent from Kansas. Here it is:

"The twin perils for children living on farms and in small villages are open wells and cisterns and loose boards left with nail points sticking out of them.

"Cover all wells and cisterns securely and draw all nails from loose boards because a child stepped on them, whether clean or rusty, is in deadly danger from the germs of Tetanus (lockjaw) with which much ground is infected."

A JACKET DRESS THAT'S SMART  
—WEAR IT 'NEATH YOUR WINTER COAT

Today's smart costume is just adored in checked woolen in Sandringham blue. The upper part of the dress is brown canton crepe. The brown tone is repeated in the bone buttons. You'll love its practicality besides its extreme smartness. It's as simple as can be to make it and the coat is surprisingly small.

Black rough woolen is another very smart scheme with the dress bodice of black metal threaded crepe or of black velvet.

Style No. 520 is designed for size 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 4½ yards of 39-inch material with 1½ yards of 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

**SIR HERBERT S. HOLT**  
Who has resigned as President of the Royal Bank of Canada and become chairman of the executive committee.

## Retires From Presidency Of The Royal Bank

Sir Herbert S. Holt Is Succeeded By Morris W. Wilson As President And Managing Director

After 26 years in office, Sir Herbert S. Holt has relinquished the presidency of The Royal Bank of Canada and now becomes Chairman of the Board and Chairman of the Executive Committee. He is succeeded by Morris W. Wilson as President and Managing Director, and Sydney G. Dobson follows Mr. Wilson as General Manager.

These changes were announced at the end of the bank's fiscal year, following a regular meeting of the board. They are changes which constitute not only an important milestone in the 55 years of Royal Bank history, but also an event of national significance. Sir Herbert Holt's retirement from the presidency marks the withdrawal from active duty of an outstanding Canadian, under whose leadership the Royal Bank has developed from a relatively small organization to its present status as one of the great financial institutions of the world. Furthermore, the appointment of Morris W. Wilson as President marks the first occasion since the bank was founded in 1867 that Sir Herbert Holt will continue in connection with the Royal Bank which began nearly thirty years ago with his election as a director in February, 1905. He was appointed vice-president of the bank two years later, and became its president on November 16, 1908.

In assuming the newly created position of Chairman of the Board, Sir Herbert Holt will continue in connection with the Royal Bank which began nearly thirty years ago with his election as a director in February, 1905. He was appointed vice-president of the bank two years later, and became its president on November 16, 1908.

He was appointed president of the bank in 1908, and became its president on November 16, 1908.

He was appointed president of the bank in 1908, and became its president on November 16, 1908.

partly to his desire to have more leisure for periods abroad, but principally to his policy of gradually transferring his direct responsibilities to younger shoulders.

Morris W. Wilson, the new President and Managing Director of the Royal Bank, was formerly Vice-President and General Manager. He is fifty-one years old, the age at which Sir Herbert became president. He was born in Lunenburg, Nova Scotia, where he entered the service of the bank. His entire business career has been with the bank, and the thirty-seven years since he began have been marked by a series of promotions through which he has acquired experience in every phase of banking activity.

In 1909, when he was twenty-six, Mr. Wilson was moved from the Maritime to Vancouver, where he became manager of the main office two years later. In 1916 he was transferred to head office in Montreal as Chief Inspector. The following year he became Superintendent of Branches, and in 1922 was appointed Senior Assistant General Manager. He was promoted to General Manager of the bank in July 1929, and in 1931 became Vice-President as well. Each of his previous positions has been, like Sir Herbert Holt, a figure of prominence in industry or commerce, and he has been a professional banker to become president of the bank.

**SYDNEY G. DOBSON**  
Who has been Senior Assistant General Manager and who now succeeds Mr. M. W. Wilson as General Manager of the Royal Bank of Canada.

Sydney G. Dobson, who has been Senior Assistant General Manager, has had a similar career. Like Mr. Wilson he was born in the Maritime, at St. John's, New Brunswick, and is fifty-one years old. He started with the bank as a junior clerk in 1907, and in 1916, after serving in various other positions, he was appointed manager of Sydney Branch in 1910 at the age of 27. Five years later he became Assistant Manager in Montreal, and in 1919 he was transferred to Vancouver to succeed Mr. Wilson as manager. In 1918 he became Assistant General Manager. He became Assistant General Manager three years later, and has occupied this position for the last twelve years.

## Little Journeys In Science

LIQUID AIR  
(By Gordon H. Guest, M.A.)

All gases, if cooled and compressed sufficiently, may be changed into liquids, or even into solids. Sulphur dioxide (the gas which is produced when sulphur burns in air) is easily converted into a liquid, but other gases, including hydrogen and oxygen, are very difficult to liquefy. The liquefaction of helium by the Dutch scientist Kamerlingh Onnes, in 1908, was regarded as a great scientific achievement.

Liquid air was first obtained about fifty years ago and since then it has been used commercially, the method of producing it having been continually improved. It is made in large quantities by an intricate machine in which the air is compressed and cooled. The point at which the air becomes liquid is called the "critical temperature". Liquid air boils at -190 degrees centigrade. When such objects as a rubber ball, an egg, a piece of meat or a flower are placed in the liquid they become nearly as brittle as glass. When a ten-kelvin filled with liquid air is placed on a block of ice it boils vigorously, for the ice is hot as compared to the liquid air.

Liquid air is used chiefly in the production of nitrogen, oxygen, argon, and is also used as a cooling agent. When mixed with charcoal it forms a powerful refrigerant, and is used for cooling and ventilating rooms, and for the destruction of bacteria, but because it is expensive to produce and difficult to handle, it has not been used extensively for these purposes.

China has about 2,000,000 square miles of arid country.

Insects destroy almost one-tenth of the world's crops.

## SUNDAY SCHOOL LESSON

DECEMBER 16

## THE CHRISTIAN AND THE LORD'S SUPPER

Golden text: "For as often as ye eat this bread, and drink the cup, ye proclaim the Lord's death till he come." 1 Corinthians 11:26.

Lesson: 1 Corinthians 11:23-24.

Devotional reading: Matthew 26:20-28.

Explanations And Comments

Paul's Account of the Instituting of the Lord's Supper, verses 23-25.

For I received of the Lord that which also I delivered unto you; with these words Paul prefaces in his letter to the Corinthians his account of the instituting of the Supper. By these words he refers to the spiritual meaning of the ritual, and coming down to him when he ponders the words spoken by Christ to his followers: Paul reports the words of Christ which he found even as these followers of Christ had reported them to him.

And when the night in which he had been betrayed took bread; and when he had given thanks, he brake it, and said: "Take, eat, this is my body, which is for you, do this in remembrance of me." And after the same manner, when he had eaten, he took the cup, and said: "This cup is for you, do this in remembrance of me."

And now at Royston these former proud German warships are being beaten into plowshares. Several hundred thousand tons of steel, iron, brass and bronze are being cut out of them until there is nothing left resembling a ship. The common grades of steel are sold to industries that make rails, which are being shipped all over the world. Much of the better grade is being bought by automobile manufacturers. The highest grade of oil, that which was armored turkeys, goes to toolmakers, shipbuilders and engine makers. Some of the fact has been resolved to Germany, where it may once reappear in the recreated pocket battleships. Brass goes to clockmakers, instrument makers and various other industries. The bronze from the heavy propellers and gun fittings is sold to other propeller makers, bell makers and other users of bronze.

Thus the end of a great navy—St. Thomas Times-Journal.

End Of Great Navy

Being Broken Up

While the naval discussions in London are seemingly full in regard to limitation, the end of what was once the second most powerful navy afloat is being encompassed at the former British naval dockyard known as Royston, just beyond the North ridge.

Under the wartime German navy is being disarmed. Probably they thought the job of raising up during the melting qualities of acetylene torches and the hammer blows of hydraulic tools.

When the Germans by pre-arranged signal scuttled their surrendered fleet at Scapa Flow they thought that was the end of their navy. Probably they thought the job of raising up during the melting qualities of acetylene torches and the hammer blows of hydraulic tools.

## 250 LB. MAN LOSES 20 LBS.

### And Looks 10 Years Younger

"About three months ago," writes a correspondent, "I weighed 250 lb. I started taking Kruschen Salts, and I lost 20 lbs. in a little over two months. I am feeling better than I have in years. My friends tell me I look ten years younger, and my step has an elasticity which is amazing. I shall boost Kruschen Salts wherever I go."—J. McC.

Kruschen contains just the six salts, blended in just the right proportion, that are essential to keep you in continual good health. Kruschen Salts keeps the system free from encumbering waste matter. Unless this wastage is expelled regularly, it will give rise to rheumatism and other body poisons. And Nature is liable to take the defensive measure of storing this poison-breeding material out of the way in the form of fatty tissue.

## THE TENDERFOOT

By  
GEORGE B. RODNEY  
Author of "The Coronado Trail,"  
"The Canyon Trail," Etc.

### SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. The Broken Spur has been adventuring looking the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go see what was happening for himself, not as Gerald Keene, half owner of the Hour-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward wilderness outfit.

Dad Kane, desert rat and luckless prospector till now is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grumbled him, of his discovery of a rich gold mine, and told him of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

Spike Goddard and Sam Dustin, fearing the old prospector may tell others the things he has come across, the branding of Carr's cattle, plot to get him to show them the location of the mine and then kill him.

Gerald Keene, dressed in ridiculous cowboy costume, arrived at the Hour-glass ranch and is hired as a cowboy by Joe Carr. The impression of a tenderfoot is successful, and he is accepted as such by the other occupants of the bunkhouse.

Proof of Dustin's cattle stealing activities was accidentally discovered by Stone, who accompanied by Carr was riding fence a long way from the Hour-glass ranch house.

Dustin unexpectedly comes along and seeing them, stops and talks to Edith. He mentions the Soda Springs dispute could be settled by marrying him, and Edith refuses his proposal.

With remarks that make Dustin flinch, he insults Stone, who promptly throws him into a corral.

(Now Go On With The Story)

### CHAPTER VII.—Continued

"If he learned that from a catalogue then I'm a Greaser," he muttered and he laid in wait for Stone when supper was done.

"What's the game?" he asked curiously. There was a grin, too, that kept the words from stinging.

Now Red Thom had almost been born in a saddle. He had punched cattle from El Gran Chaco to the Barren Ground and he was not to be put off.

"I seen you fall," he said grimly. "A green man can't fall like that. It takes practice. A new man falls stiff. You relax, and very muscle and that's why you didn't break every bone in your body. Come clean, son. I'll not give you away less'n I have to. Where's your from?"

"That is a dangerous question to ask at times but Stone did not resent it."

"I got to spread my own rope my own way," he said, and the homely idiom made Red Thom open his eyes. "You don't mind a man attending to his own business, do you?"

"Huh. I reckon not. But you see a few of us have spent a long time here on the Hour-glass. You claim to be a new man. All right. Let it go at that. Get me a ?"

Thom's eyes bored into Stone's inner consciousness and both men grinned at each other in friendly fashion. In that moment a lasting friendship was born. The bunk-house

## SOURD ON THE WORLD?—THAT'S THE LIVER

Wake up your Liver Bile

—No Calomel necessary

Many people who feel sour, sluggish and generally unwell, are the victims of a liver that is not working properly. The bowels and stomach are the only organs that should be kept in good working order. If you are suffering from a sluggish liver, you should take a course of S.C. Liver Bile.

Take a course of S.C. Liver Bile and you will find that your liver is working properly and that you are feeling better than ever before.

Get a bottle of S.C. Liver Bile today. It will cost you only a few cents, but it will save you a great deal of trouble and suffering.

Write to S.C. Laboratories, 1000 Broadway, New York, N.Y., for a free booklet and sample.

W. N. U. 2076

never noticed that Red Thom watched Stone carefully from that day. They were intent on their own deductions.

"He's got that Isabella horse on 'em," he said. "Quoth Derwent. 'The man's got patience and that's all four. He says he ain't breakin' him; he's a-learnin' him. Learned it outen a book, he says. Give him two years under a man and he'll make a good hand.'"

"If Sam Dustin don't kill him first," said some one.

"He won't. . . . There was prophecy in Red Thom's voice. 'Where is he now?'"

"Crews sent him out to ride the West fence up in the Red Water canyon to-day. Told him to take his pack and stay there till he got the place fixed. Damn nasty job for one man, if you ask me."

He was right at that. Stone added his big horse at dawn and headed west across the foot-hills for the more distant ranges, where the land was out in craggy little peaks and jutting hill-shoulders. He worked his way up; beyond where the mesquite runs out in curly bunch grass, where the red-stemmed madroña gives place to stunted juniper and the red-and-black maipalms ledge make horse and man look to their footing.

That fence was along a steep hillside; it stepped drunkenly across deep canyons and arroyos; it twisted among stunted rock-oaks and it dipped into forgotten valleys where the sun shined down from water.

He finally drew rein top of a rise and studied the land below him.

Red Thom alone at the Hour-glass might not have been surprised at the metamorphosis of the new hand of the Hour-glass. Gone was the slackness of a tired rider. His slim figure appeared yellow from lack of water.

He melted and poured the light hand on the bit told why that Isabella horse, for months rejected by the rough-handed riders at the Hour-glass, had "come to hand" till now he responded to the lightest touch of that one hand that he knew. A certain indefinable light in the rider's eyes told, too, that under that devil-may-care exterior lay a stratum of danger that had better be left alone.

He loafed in his saddle and scrutinized the flat land below him. The little plain was dotted with mesquite and into a slightly cholo and "nigger-bird" cactus and the green paddies of the prickly pear showed in great bloated blotches against the yellow of the dry grass.

A few stunted live-oaks pricked out an irregular pattern.

"It ought to be fairly alive with cattle," he said.

His voice seemed a shout in the universal stillness that was broken only by the wind across the grass and the occasional slide of caving earth down the wall of some dried arroyo. "It sure looks queer to me."

This Hour-glass ranch has got land and water, men and grass. Every damned thing but cattle. It looks to me as if this talk of Carr just havin' hard luck is all both. Even a man's broken leg doesn't keep his cows from calvin'."

"I'd give something pretty to know what's happenin'. Of course it's Broken Spur. . . . But . . . to prove it is different."

He studied the distant landscape with somber eyes, but his brain was busy with other matters. Cattle? Where were the cattle that ought to be dotting that broad plain?

"It looks to me as though the old man left a net loss to his heirs. Anybody who would holler with joy over a bequest like the Hour-glass as it stands to-day would sure chuck for a china egg."

"Wait a bit! Let's work this out by simple Rule o' Three. If old man Carr had ample cattle and didn't sell 'em or trade 'em, and if they didn't lay down and die on him, then it's a moral certainty that somebody else either has got or is gettin' 'em."

He remembered that cow down by Soda Springs.

"Looks funny Edith didn't tell her father about that cow. Old Carr must be scared of Dustin at the Broken Spur. That looks bad."

"I'm goin' to sit in the game I've got to draw cards. And I've got to sit in the game for my own sake. . . . (Even to himself he did not yet admit that Edith was a governing cause in the game.) "It looks to me like somebody's got to call this man Dustin an see what he holds."

He swung out of saddle and let his reins trail. The horse, on his honor by those trailing reins, pawed once or twice at an ant hill and stood with drooping head while Stone settled himself for a study of the valley.

Miles away he could see the line of trees to the east that marked the land where the Hour-glass men were working in a vain hope to find enough cattle to be worth while. Soda Springs was the hub of the wheel of life on the Hour-glass and Soda Springs was in debate.

## Second Mirror For Telescope

Twenty Tons Of Molten Glass Poured In Record Time

The second 200-inch mirror for the world's greatest telescope, the astronomical eye that will see 1,000,000 times better than the human eye, has been poured without a single apparent flaw at the Corning glass works.

The time was record-breaking, six hours and 53 minutes, for 20 tons of molten glass, ladled out in 104 huge gobs that fairly scorched the faces of spectators and scientists who encircled the great pouring room.

The time was nearly twice the speed of pouring the first "eye" last March.

For the first time, it was announced officially the March mirror is a success. This means if the second mirror comes out of the annealer 10 months hence in as good shape as now expected, astronomers will have two of these giant mirrors, instead of the one originally planned.

They have the money to build only one telescope. The equipment to complete a second would cost something less than the price of one battleship.

In six years or so hence this mirror, or its "spare," the March eye, will be ready to increase man's vision into space from the present 300,000, 000 light years' distance to nearly 1,000,000 years.

The 200-inch telescope, that is, will see light which started on its journey toward the earth 900,000 years ago.

The first mirror, the March eye, was completed in 1918.

The second mirror, the March eye, was completed in 1918.

The third mirror, the March eye, was completed in 1918.

The fourth mirror, the March eye, was completed in 1918.

The fifth mirror, the March eye, was completed in 1918.

The sixth mirror, the March eye, was completed in 1918.

The seventh mirror, the March eye, was completed in 1918.

The eighth mirror, the March eye, was completed in 1918.

The ninth mirror, the March eye, was completed in 1918.

The tenth mirror, the March eye, was completed in 1918.

The eleventh mirror, the March eye, was completed in 1918.

The twelfth mirror, the March eye, was completed in 1918.

The thirteenth mirror, the March eye, was completed in 1918.

The fourteenth mirror, the March eye, was completed in 1918.

The fifteenth mirror, the March eye, was completed in 1918.

The sixteenth mirror, the March eye, was completed in 1918.

The seventeenth mirror, the March eye, was completed in 1918.

The eighteenth mirror, the March eye, was completed in 1918.

The nineteenth mirror, the March eye, was completed in 1918.

The twentieth mirror, the March eye, was completed in 1918.

The twenty-first mirror, the March eye, was completed in 1918.

The twenty-second mirror, the March eye, was completed in 1918.

The twenty-third mirror, the March eye, was completed in 1918.

The twenty-fourth mirror, the March eye, was completed in 1918.

Christmas—New Year's—the great holiday season now drawing close would not be complete without mince pie. Brought to the table, steaming hot, with the delicious filling in a crisp, flaky pastry, mince pie is a table delight looked forward to by every family. And when it's made with PURITY FLOUR you don't need to worry about your pastry. As with cakes, bread, rolls or biscuits, you know that any PURITY FLOUR baking ranks high in flavor, texture and color. Every bag of it is guaranteed to be of the same high quality.

Only the finest hard wheat, personally selected in Western Canada, by one representative goes into the milling of it. Buy a bag of PURITY FLOUR at your grocer's. You'll find that it's only one brand, and that PURITY is all you need to keep on hand for all kinds of baking.

At life is illustration of recipe No. 895. In the new PURITY COOK BOOK, sent to you postpaid for 50 cents. In addition to the cook book, PURITY FLOUR now offers a convenient recipe file. In attractive cover, well illustrated and featuring PURITY FLOUR recipes, it contains 8 envelopes for filing favorite recipes received from friends or clipped from newspapers. Sent to you postpaid for 25 cents, or with the cook book for 69 cents. Send today for your copies to Dept. 6600, Western Canada Flour Mills Co. Ltd., Toronto, Winnipeg, or Calgary.

## Business Is Profitable

Drugs And Jewels Smuggled Into England By Air

Smuggling of drugs, Paris fashions and jewels into Britain by air has grown to an astonishing scale.

British tariffs on silk, expensive dresses, jewelry and drugs make this illicit traffic a highly profitable business.

Thousands of pounds of these articles can be loaded on a single plane.

The traffic in drugs, always difficult to detect, is known to be growing at an ever greater rate.

Opium, cocaine, heroin and other narcotics are being peddled in the West End and other cities in quantities far in excess of those shown by the import certificates.

An official at Croydon aerodrome expressed the opinion that this smuggling must be carried out on a very large scale if it is made to pay.

"Most of the large aerodromes are too well watched to make the risk worth while," he said.

"The forces the smuggler to choose some isolated spot off the usual air routes."

"Only the cleverest organization and the close co-operation of paid accomplices with high-powered cars could make such a task practicable."

Clock Will Speak Time

Experiments Being Made In England With New Gadget

A clock that talks! Not the cuckoo variety, but a clock which will "speak" the time.

This promises to be the latest timepiece in the office. The British post office research station are experimenting with an apparatus which will put "pip" into clocks.

By dialing a special number the office clock will "speak" the time. This will follow "pips" at 10 second intervals, except at 50 seconds past each minute, when there will be the announcement, for example, "On the third 'pip' it will be exactly 7:46."

The last of three high-pitched signals will indicate then the exact minute.

An Unusual Book

The summer exhibition on the second floor of the Boston Athenaeum contains a book bound in the skin of its author, a notorious highwayman. The book was published in 1837 and is titled "Narrative of the Life of James Allen, Alias George Walton, Being His Deathbed Confession to the Warden of Massachusetts State Prison."

It is announced that the Queen and the Duchess of York have acceded to the request of Lord Derby, the president of the British Textile Exhibition, made on behalf of the committee of the exhibition, to name two new colors in which British dress fabrics will be displayed by manufacturers at the textile section of the British Industries fair in February.

The color to be chosen by the Queen will be named "Jubilee," and that chosen by the Duchess of York will be named "Margaret Rose."

Remedy For Gossiping

The Christian Science Monitor says when any bit of gossip was told to Mrs. Hannah More, she would say, "Come we will go and ask if this be true."

The gossip-beater was always so astounded that she would beg to have no further notice taken of the report. But Mrs. More was determined and off she would take the tale-bearer to the one of whom the story was told. No one brought gossip to Mrs. More a second time.

The bullfrog is the largest of North American frogs, and the largest representative of a genus of aquatic frogs widely distributed over the northern hemisphere.

Little Helps For This Week

"Whom having not seen ye love, in whom though now ye see Him not, ye rejoice with joy unspeakable and full of glory." 1 Peter 1:8.

"If ye love I will keep my commandments." John 14:15.

Blessed be Thy love dear Lord, That taught me this sweet way, Only to love Thee for Thyself, And for that love obey.

To love God is to love His character. God is Purity, and to be pure in thought and look, to turn away from unwholesome books and conversation, to absorb the moments in which we have not been pure, is to love God. God is Love; and to love men until it has expanded into a philanthropy which embraces all, even enemies with compassion, that is to love God. God is Truth, and to be true, to hate every form of falsehood, to live a brave, true, real life, that is to love God. God is Infinite, and to love the boundless, reaching on from grace to grace, adding faith to charity, aiming incessantly to be perfect, even as the Father is perfect, that is to love God.—F. W. Robertson.

May Test Mail Rocket

German Engineer Receives Permission From French Air Ministry

The French Air Ministry has authorized Gerhard Zucker, German engineer, to test a device for shooting mail by rocket across the English Channel. A mailbag is to be attached to the rocket, containing 12,000 letters. It will be shot from Dover over the Channel to Calais, on the French coast, twenty-five miles distant. The rocket contains an explosive liquid ignited electrically. After a fixed number of minutes a parachute opens, allowing the mailbag to float to earth.

Opium Smuggled In Fish

A unique method of smuggling dope was uncovered in China when a Chinese buying provisions for a wedding feast, was refused purchase of an especially large fish in the markets. He reported to police, who watched the dealer retreat to sell the fish to all except a man with a basket full. On investigation, the fish was found to contain many tins of opium.

A Hollywood inventor has succeeded in making a phonograph record which he uses for voices of little dolls he makes perform in a miniature theatre.

The ENERGY VALUE of Cod Liver Oil PLUS SPEEDY ASSIMILATION

With emulsified oils digestion begins at once in the stomach. Ordinary oils must first combine with the pancreatic juices—to form an emulsion—before they can be assimilated.

Scott's Emulsion is more quickly and easily assimilated than plain Cod Liver Oil because it is already emulsified. Scott's Emulsion is rich in body-building phosphoproteins of lime and soda—PLUS values you get in Scott's Emulsion of Cod Liver Oil.

SCOTT'S EMULSION

THE COD LIVER OIL WITH THE PLUS VALUE

## LOCAL AND GENERAL

W. Bell of the Grand Union has been quite ill during the week.

Mr. and Mrs. J. A. McDonald spent the week-end at Calgary, where their daughter Penelope is in training at Holy Cross hospital.

An effort is being made to have Boxing Day [the day following Christmas] declared a local holiday. If the town has the power, a by-law will be passed to this effect, it is reported.

People are reminded of St. Alban's ladies guild bazaar on Saturday afternoon, and the whist drive and dance in the parish hall in the evening. The ladies are trying to raise some money for church expenses, and will have many useful articles, cakes, pies and preserved fruits on sale. Call from 3 to 6 p. m. for tea at the hall.

Hoover is dead! And who's Hoover? you may ask. He was the pet spaniel of Dora Burrows, born just before the presidential election when Herbert Hoover was elected, and named in his honor. Poor Hoover came to an untimely end in his sixth year by being knocked down by an automobile in front of Geo. Neil's men's wear store. He was laid away quietly on the hillside, and the little pile of bones which he was accustomed to gather around the fire hall will be but a memory.

A kitchen shower was held at the home of the Misses Higginbotham on Wednesday Dec. 5, in honor of Miss Jean Hughes, about 24 guests being present. Court whist was played, the winners being Miss Annie Nicholas, first, Mrs. Robt. Bell, second and Mrs. H. Sherritt consolation. A dainty lunch was served by the hostesses after which the bride-elect was the recipient of many beautiful and useful gifts. Miss Hughes replied very appropriately and the evening was brought to a close with a sing-song.

## Everyone Should Buy an Apple on Saturday

Bright and early on Saturday, Dec. 15, Boy Scouts under Scoutmaster Reggie Jones and Scoutmaster Llewellyn will be out with the choicest apples the market can produce. They will sell to all and sundry, and the more you pay for an apple the greater will be your share of happiness in contributing towards a Christmas hamper for some of the less fortunate people in Coleman. So, when a cheery-faced Boy Scout asks you to buy an apple, remember that it is for the Christmas cheer fund.

## Elks Will Give Christmas Treat to Children

Coleman Elks Lodge will hold a matinee at the Palace theatre for children on Christmas Day at 1 o'clock, at which bags of candies, nuts and oranges, will be distributed to all under 12 years of age.

## ST. ALBAN'S CHURCH

Next Sunday, the 3rd, in Advent, the service will be: 11.15 a. m. Holy Communion, 12.30 p. m. Sunday School, The Bible class on Friday in the church at 7 p. m. Everyone welcome.

## UNITED CHURCH

Sunday, Dec. 16, in the morning the girl's choir will sing and Mr. Taylor will continue the series of the Lord's prayer, the subject being "Pray for Obedience." Sunday school at 12.15. Christmas tree entertainment Dec. 21.

At 7 p. m. Sunday the subject of the sermon will be "Finding Christ in Christmas." Christmas hymns will be led by the choir, under Mrs. R. Upton--Rev. Roy C. Taylor, B. A., B. D., minister.

## Co operation Appreciated

For the splendid co operation and support given by all who are taking part in the production of "Campus Co Ed" on Monday and Tuesday, the committee sponsoring same express their sincere appreciation.--H. T. Halliwell, chairman.
